Objective

Motivated Computer Science upcoming senior with a solid foundation in full-stack application development and Data Science. Seeking a summer 2026 internship and other opportunities to apply my academic knowledge and problem-solving skills to contribute to the goals of the organization.

Education

The University of Mississippi (Ole Miss), GPA 3.54

Expected Graduation May 2027

Bachelor of Science, School of Engineering

Major: Computer Science *Emphasis:* Data Science

Honors: Dean's and Chancellor's Honor Roll, Academic Scholarships

Relevant Coursework

- Algorithm & Data Structure Analysis, Software Design & Development, Operating Systems, Database Systems, Advanced Data Science, Computer Organization & Assembly Language

Technical Projects

Inspect AI | *Co-Developer* | inspectai.info

- Co-engineered a full-stack Next.js web application with a four-person team to introduce transparency and streamline university dorm inspections.
- Designed and built the interactive inspection portal and submission forms, ensuring a seamless data-entry workflow for users.
- Refined the user interface, resolved critical frontend bugs, and successfully deployed the live, production-ready platform using Vercel.

Work Experience

Georgia Blue Madison, MS

Summer 2023, 2024, and 2025

Server

- Kept up with a fast-paced environment by staying organized and managing time across multiple tables.
- Worked closely with the kitchen and front-of-house teams to keep everyone on the same page and serve customers smoothly.
- Solved problems quickly on the floor and handled customer complaints calmly when things got stressful.

Bridlewood of Madison Madison, MS

2022-2023

Event Staff

- Paid close attention to the details of event setups to make sure everything looked exactly how the client wanted it.
- Teamed up with the rest of the staff to get large-scale venue setups and teardowns done on time.
- Figured out quick fixes for unexpected layout or timing issues during live events.

Skills

- **Languages:** Python, JavaScript, SQL, TypeScript, Java, C/C++, Bash, HTML/CSS
- **Frameworks & Libraries:** Next.js, React, Node.js, Tailwind CSS
- **Data Science/ML:** Pandas, NumPy, Scikit-learn, Jupyter Notebooks
- **Tools:** Git/GitHub, Firebase, Vercel, Command Line, Database Systems
- **Concepts:** Software Engineering, Data Structures & Algorithms, Agile Teamwork, Debugging & Testing

Activities & Affiliations
